

Login Troubleshooting

Forgot password: use Forgot password on the login page. Reset links expire after 1 hour.

SSO login fails: confirm your organization admin enabled SSO for your email domain. Supported providers: Okta, Azure AD, Google Workspace.

Session expired: clear browser cookies for our domain and sign in again. Sessions last 12 hours by default.

Two-factor authentication: if you lost your device, use backup codes from Settings > Security. Contact support if codes are unavailable.

If login still fails, contact support with browser version, operating system, and any on-screen error message.
