

Data Export and Backup

Export project data as JSON or CSV from Settings > Data > Export. Exports include jobs, users, and configuration.

Free plan: manual export only. Pro plan: scheduled weekly exports to S3-compatible storage. Enterprise: daily exports and point-in-time recovery.

Large exports over 1 GB are delivered as a download link valid for 7 days.

Backups are encrypted at rest. Request a data deletion certificate after account closure under Settings > Privacy.
